The Most Compact Network Adapter - QSSC TG20 Now is Available

(Taipei, Taiwan, June 11, 2009) — QSSC, the worldwide IT solution provider, announces its innovative enterprise solution-- 10 Gigabit Ethernet server adapter TG20. TG20, the most compact network adapter in the current marketplace, provides the fastest set of wheels to let your business enjoy speed of surfing the network.

QSSC's TG20 is an ultra low-profile dual-port 10GbE SFP+ network adapter built around QLogic's third-generation NX3031 Intelligent NIC® silicon, which offers industry-leading price/performance and features tailored for the mainstream enterprise networking market. TG20 runs on a PCI Expression Gen2 x 8 interface and supports both Direct Attach Copper and Optical interfaces. It is now the most compact network adapter in the marketplace; with its dimensions of 2.71"(W) x 4.72"(L) x 0.57"(H), it is flexible for server design and increases rack density. Its advanced "Stateless" offload feature and TOE support accelerate throughput and reduce CPU utilization.

In addition, as server virtualization and network convergence trends continue to accelerate, customers are looking for 10 Gigabit Ethernet network connectivity solutions to support their evolving strategies. TG20, certified by VMware, is definitely a perfect solution tailored to meet the requirements of all tiers of enterprises as they make the transition to virtualization and 10GbE networking environment.

"TG20 is the perfect complement to our portfolio of servers, I/O adapters, and switching solutions, enabling us to deliver total solutions for customers looking for 10Gb Ethernet network connectivity." said Mike Yang, Vice President of QSSC. "Enterprise customers will be surprised at its high performance of making business increase flexibility and productivity."
